

# Rock Lake Improvement Association Volunteer Opportunities!

Please contact us at [mail@rocklake.org](mailto:mail@rocklake.org) if you may be interested in any of these activities, have questions, or want to be on our occasional mailing list.

**A. Passionate about the value of mature trees and an overhead canopy? Enjoy social media?**

We are looking to develop a new campaign educating residents on the value of mature trees, encouraging residents to nominate guardian trees and developing walking tours to honor those nominations.

**B. Love being out on the lake and connecting with active people?**

We are looking to set-up social opportunities to enjoy Rock Lake together.

**C. Enjoy walking through Korth Park to the Glacial Drumlin Trail? Willing to investigate social funding platforms?**

We are looking to develop funding mechanisms to help the County afford paving the gravel path through Korth and to the Glacial Drumlin Trail. Right now, residents with mobility issues struggle to access the lake shore path.

**D. Like to do some quick physical work with others on an important project?**

How about spending a fall afternoon cleaning out storm drain grates that direct their leaves, sticks and detritus to Rock Lake?

**E. Do you enjoy graphic design and layout of flyers or handouts? What applications are you comfortable with?**

We desperately need help catching people's attention and your skill might be just what will do the trick!

**F. Do you have any experience with Mail Chimp? Could you set up a template to make newsletters and group emails faster to develop?**

Right now we use Vertical Response and we're having some difficulty with that vendor. We could use help switching...

**G. Do you have any experience with integrating Mail Chimp into Word Press?**

Yep, a very specific need. Our website is in Word Press and we could use help integrating other programs into it.

**H. Do you enjoy tracking things? Keeping records?**

Last year's drought focused everyone's attention on rainfall, the lack of it, and its impact on lake levels. We desperately need volunteers to monitor precipitation. The Community Collaborative Rain, Hail and Snow Network (CoCoRaHS) is a non-profit, community-based network of volunteers of all ages and backgrounds working together to measure and map precipitation (rain, hail and snow). For further information: <https://cocorahs.org/>
